Hi Brian,

Thank you for your response. I understand that there is a lot of material to cover in this application; however, given that this project was just obtained by the Board for jurisdiction last Friday and they will be following an expedited review process, I am reluctant to wait on comments until April 19th. I can allow for an additional 2 weeks, with comments being due on April 5th, but that is going to have to be the deadline for this first round of review comments.

Thank you for your cooperation in this matter.

Becky

That's hard to say as several members of our department are involved. Could we have another month?

Hi Brian,

By what date do you expect that you will be able to send me your comments?

Hi Becky,

It looks like we will need additional time to review and comment on the permit application. Is

that a possibility? The BPL review deadline is 4/9. We may have to ask them for additional time as well.

Thanks,
Brian
